

RAJA GAUTAM

Software Test Engineer (Manual + Automation)

New Delhi, India • +91-8765820940 • rajagautam.qa@gmail.com • [linkedin.com/in/raja-gautam](https://www.linkedin.com/in/raja-gautam)

PROFESSIONAL SUMMARY

Result-oriented **QA Automation Engineer** with 2+ years of experience in Test Automation, Manual Testing, API Testing, and Database Validation. Proficient in developing and maintaining scalable automation frameworks using **Selenium WebDriver with Java** and **Playwright with TypeScript**, including **BDD with Cucumber**. Experienced in API automation using REST Assured and CI/CD integration using Jenkins and GitHub Actions, with a strong focus on regression testing, test coverage, and software quality.

TECHNICAL CORE COMPETENCIES

• Languages:	Java, TypeScript, JavaScript, SQL
• Automation Tools:	Playwright, Selenium WebDriver
• API Testing:	Postman, REST Assured, REST APIs, JSON Validation, Status code & Schema Validation
• Frameworks & Libraries:	TestNG, Maven, Page Object Model (POM), Cucumber BDD, Gherkin, Hybrid Framework
• CI/CD & Version Control:	Git/GitHub, GitLab, GitHub Actions, Jenkins, Docker
• Methodologies & Tools:	Manual Testing, JIRA, Agile/Scrum, Regression & Smoke Testing, End-to-End Testing Cross Browser Testing, Test Case Design, Test Failure Analysis, Retry & Trace Viewer

PROFESSIONAL EXPERIENCE

QA Engineer (Manual + Automation)

Aug 2024 – Present

Neubotic Technologies

New Delhi, India

Project 1: Info Solution CRM | Selenium - Java & Manual (Aug 2024 – July 2025)

- Analyzed Business Requirement Documents (BRD) and user stories to design, write, and maintain detailed manual test cases and test scenarios for core CRM modules.
- Conducted end-to-end manual testing, including Functional, Integration, Smoke, and Regression Testing to ensure complete feature coverage before automation.
- Designed and implemented a Hybrid Test Framework utilizing **Selenium WebDriver, TestNG, and Maven** to cover **85%** of critical CRM workflows.
- Integrated regression test suites with **Jenkins CI/CD pipelines**, accelerating feedback loops and saving 15+ manual testing hours per sprint.
- Performed manual API validation using Postman and automated RESTful APIs using REST Assured.

Project 2: Konga.com (E-Commerce Platform) | Playwright – TypeScript (Aug 2025 – Present)

- Architected a modern **Playwright (TypeScript) framework** using Page Object Model (POM), reducing overall script maintenance effort by **35%**.
- Programmed end-to-end critical business workflows (User Login, Product Search, Shopping Cart, Checkout), increasing test coverage to **85%**.
- Configured **GitHub Actions and CI/CD pipelines** to trigger daily regression runs, detecting critical bugs prior to production releases.
- Implemented Data-Driven Testing using external JSON data sets to validate complex edge-case transaction scenarios seamlessly.

KEY ACHIEVEMENTS

- Reduced overall regression suite execution time by **50%** by leveraging parallel execution in Playwright and TestNG.
- Increased test suite reliability and coverage to **85%**, significantly lowering post-release production defects.
- Streamlined sprint cycle releases by integrating sanity builds directly into Jenkins CI/CD pipelines.

EDUCATION

Bachelor of Computer Applications (BCA)

Graduated

Prof. Rajendra Singh (Rajju Bhaiya) University, Prayagraj

• 12th (UP Board): 63% | • 10th (UP Board): 80%
